

DELTA FX
This is Forex 

General Risk Disclosure
(Version 2023)

1 Introduction

- 1.1 **Delta FX** (after this referred to as the 'Company') is incorporated under the laws of Saint Vincent with Registration 24975 IBC 2018, having its registered office at C/o Suite 305, Griffith Corporate Centre, Beachmont, Box 1510 Kingstown, St. Vincent and the Grenadines.
- 1.2 The objects of the Company are all subject matters not forbidden by the International Business Companies (Amendment and Consolidation) Act, Chapter 149 of the Revised Laws of Saint Vincent and the Grenadines, 2009, in particular, but not exclusively all commercial, financial, lending, borrowing, trading, service activities and the participation in other enterprises as well as to provide brokerage, training and managed account services in currencies, commodities, indexes, CFDs and leveraged financial instruments.
- 1.3 The Company is authorised as an International Business Company under the International Business Companies (Amendment and Consolidation) Act, Chapter 149 of the Revised Laws of Saint Vincent, 2009 (herein the "Law").

2 Risk Warning

- 2.1 The Client should not engage in any investment directly or indirectly in Financial Instruments unless he knows and understands the risks involved for each one of the Financial Instruments offered by the Company. So, before applying for an account, the Client should consider carefully whether investing in a specific Financial Instrument is suitable for him in light of his circumstances and financial resources.
- 2.2 If the Client does not understand the risks involved, he/she should seek advice and consultation from an independent financial advisor. If the Client does not understand the risks involved in trading in any Financial Instruments, he/she should not trade.

3 General Risks and Acknowledgements

- 3.1 The Client is warned of the following risks (not exhaustive):
 - (a) The Company does not and cannot guarantee that money deposited in his Client Account for trading will not be lost due to his transactions.
 - (b) The Client should acknowledge that regardless of any information the Company may offer, the value of any investment in Financial Instruments may fluctuate downwards or upwards, and the investment may become unimportant.

- (c) The Client should acknowledge that he runs a significant risk of incurring losses and damages due to the purchase and/or sale of any Financial Instrument and accepts that he is willing to undertake this risk.
- (d) Information on the previous performance of a Financial Instrument does not guarantee its current and/or future performance. The use of historical data does not constitute a binding or safe forecast as to the corresponding future performance of the Financial Instruments to which the said information refers.
- (e) The Client is hereby advised that the transactions undertaken through the dealing services of the Company may be speculative. Significant losses may occur in a short period and may be equal to the total of funds deposited with the Company.
- (f) Some Financial Instruments may not become immediately liquid as a result, e.g., of reduced demand and the Client may not be in a position to sell them or quickly obtain information on the value of these Financial Instruments or the extent of the associated risks.
- (g) When a Financial Instrument is traded in a currency other than the currency of the Client's country of residence, any changes in the exchange rates may have a negative effect on its value, price and performance.
- (h) A Financial Instrument on foreign markets may entail risks different to the usual risks of the markets in the Client's country of residence. In some cases, these risks may be more significant. Exchange rate fluctuations also affect the prospect of profit or loss from transactions on foreign markets.
- (i) A Derivative Financial Instrument (i.e. option, future, forward, swap, contract for difference) may be a non-delivery spot transaction allowing making profit on changes in currency rates, commodity, stock market indices, or share prices called the underlying instrument
- (j) The value of the Derivative Financial Instrument may be directly affected by the security price or any other underlying asset which is the object of the acquisition.
- (k) The Client must not purchase a Derivative Financial Instrument unless he is willing to undertake the risks of losing all the money he has invested and also any additional commissions and other expenses incurred.
- (l) Under certain market conditions, executing an order may be difficult or impossible.
- (m) Placing Stop Loss Orders serves to limit your losses. However, under certain market conditions, the execution of a Stop Loss Order may be worse than its stipulated price, and the realized losses can be more significant than expected.
- (n) Should the Client's Equity be insufficient to hold current positions open, the Client may be called upon to deposit additional funds at short notice or reduce exposure. Failure to do so within the time required may result in the liquidation of positions at a loss, and he/she will be liable for any resulting deficit.

- (o) The Client's attention is expressly drawn to currencies traded so irregularly or infrequently that it cannot be sure that a price will be quoted at all times or that it may be difficult to effect transactions at a price which may be quoted owing to the absence of a counterparty.
- (p) No matter how convenient or efficient, trading online does not necessarily reduce the risks associated with currency trading.
- (q) There is a risk that the Client's trades in Financial Instruments may be or become subject to tax and/or any other duty, for example, because of changes in legislation or his circumstances. The Company does not warrant that no tax and/or any other stamp duty will be payable. The Client should be responsible for any taxes and/or any other duty which may accrue in respect of his trades.
- (r) Before the Client begins to trade, he should obtain details of all commissions and other charges for which the Client will be liable. If any charges are not expressed in money terms (but, for example, as a dealing spread), the Client should ask for a written explanation, including appropriate examples, to establish what such charges are likely to mean in specific money terms.
- (s) The Company will not provide the Client with investment advice relating to investments or possible transactions in investments or make investment recommendations of any kind.
- (t) There may be situations, movements and/or conditions occurring at the weekend, at the beginning of the week or intra-day after the release of significant macroeconomic figures or economic or political news that make currency markets open with price levels that substantially differ from previous prices. In this case, there exists a significant risk that orders issued to protect open positions and open new positions may be executed at prices significantly different from those.
- (u) At the time of starting the market after official holidays, due to market fluctuations, the market may be accompanied by a gap and trades such as Pending Orders, Take Profit and Stop loss are made at a higher or lower price which is entirely normal. The customer must bear the responsibility for the resulting loss, and the company has the right to remove orders without notifying the customer to avoid possible losses.
- (v) At the time of publishing the news, due to the high transaction risks, there is a greater possibility of customer investment loss. Also, due to the volume of transaction requests and other technical issues, the customer's request may not be implemented on time or even cancelled, and the executed price may be different from the customer's requested price. The customer must bear the responsibility for the resulting loss. The transaction has been accepted under such conditions, and the company will not be liable for the possible losses of the customer.

4 Third Party Risk

- 4.1 The Company may be required to hold your money in an account that is segregated from other Clients and the Company's money in accordance with current regulations, but this may not afford complete protection.
- 4.2 The Company may pass money received from the Client to a third party (e.g., a bank) to hold or control to affect a Transaction through or with that person or to satisfy the Client's obligation to provide collateral (e.g., initial margin requirement) in respect of a Transaction. The Company has no responsibility for any acts or omissions of any third party to whom it will pass money received from the Client.
- 4.3 The third party to whom the Company will pass money may hold it in an omnibus account, and it may not be possible to separate it from the Client's or the third party's money. In the event of insolvency or any other analogous proceedings in relation to that third party, the Company may only have an unsecured claim against the third party on behalf of the Client, and the Client will be exposed to the risk that the money received by the Company from the third party is insufficient to satisfy the claims of the Client with claims in respect of the relevant account. The Company does not accept any liability or responsibility for any resulting losses.
- 4.4 A Company, Bank, or Broker through whom the Company may deal could have interests contrary to the Client's interests.
- 4.5 The insolvency of the Company or of a Bank or Broker used by the Company to affect its transactions may lead to the Client's positions being closed against your wishes.
- 4.6 The insolvency of the Company or of a Bank or Broker used by the Company to affect its transactions may lead to the Client's positions being closed against your wishes.

5 Trading Platform Risk

- 5.1 The Company may be required to hold your money in an account that is segregated from other Clients and the Company's Cash in accordance with current regulations, but this may not afford complete protection.
- 5.2 Clients, who undertake transactions on an electronic trading system, will be exposed to risks associated with the system, including the failure of hardware and software (Internet/Servers). The result of any system failure may be that an order is either not executed according to the instructions provided for it or is not executed at all. The Company does not accept any liability in the case of such a failure. The use of wireless connections or dial-up connections, or any other form of unstable connection at the client's end, may result in poor or interrupted connectivity or lack of signal strength, causing delays in the transmission of data between the client and Company when using

the Company's Electronic Trading Platform. Such delays or disturbances may result in the client sending to the Company out-of-date 'Market Orders'. In these circumstances, the Company will update the price and execute the order at best available 'market price'.

- 5.3 The Client acknowledges that only one Instruction is allowed to be in the queue at one time. Once the Client has sent an Instruction, any further Instructions sent by the Client are ignored, and the "orders are locked" message appears until the first Instruction is executed.
- 5.4 The Client acknowledges that the only reliable source of Quotes Flow information is that of the live Server's Quotes Base. Quotes Base in the Client Terminal is not a reliable source of Quotes Flow information because the connection between the Client Terminal and the Server may be disrupted at some point, and some of the Quotes may not reach the Client Terminal.
- 5.5 The Client acknowledges that when an Order is closed or being executed, it may not be cancelled or modified.
- 5.6 The Client may lose all amounts he has deposited with the Company as a margin. The placing of certain orders available on the Trading Platform (e.g., "stop-loss" or "limit" orders) that are intended to limit losses to certain amounts may not always be effective because market conditions or technological limitations may make it impossible to execute such orders. Please also note that for all orders (including guaranteed stop loss orders), you may sustain the loss (which your order is intended to limit) in a short period. In other cases, the execution of a Stop Loss order may be worse than its stipulated price, and the realized losses can be larger than expected.

6 Technical Risk

- 6.1 The Client and not the Company shall be responsible for the risks of financial losses caused by failure, malfunction, interruption, disconnection or malicious actions of information, communication, electricity, electronic or other systems.
- 6.2 The Company has no responsibility if authorized third persons have access to information, including electronic addresses, electronic communication and personal data, access data when the above are transmitted between the Company or any other party, using the internet or other network communication facilities, telephone, or any other electronic means.
- 6.3 The Client acknowledges that the unencrypted information transmitted by e-mail is not protected from unauthorized access.
- 6.4 At times of excessive deal flow, the Client may have some difficulties to be connected over the phone or with the Company's trading platform(s)/system(s), especially in a fast Market (for example, when key macroeconomic indicators are released).
- 6.5 The Client acknowledges that the internet may be subject to events which may affect his access to the Company's website and/or the Company's trading platform(s)/system(s),

including but not limited to interruptions or transmission blackouts, software and hardware failure, internet disconnection, public electricity network failures or hacker attacks. The Company is not responsible for any damages or losses resulting from such events which are beyond its control or for any other losses, costs, liabilities, or expenses (including, without limitation, loss of profit) which may result from the Client's inability to access the Company's Website and/or Trading System or delay or failure in sending orders or Transactions.

6.6 The Client is warned that when trading on an electronic platform, he assumes the risk of financial loss, which may be a consequence of, among other things:

- (a) Failure of Client's devices, software and poor connection quality.
- (b) The Company's or Client's hardware or software failure, malfunction or misuse.
- (c) Improper work of Client's equipment.
- (d) Delayed updates of Client's Terminal.
- (e) Wrong setting of Client's Terminal.
- (f) Restrictions related to countries and governments
- (g) Wrong settings in the use of Expert-Advisors, Robot, Script and other software connected to the trading platform.

6.7 In connection with the use of computer equipment and data and voice communication networks, the Client bears the following risks among other risks in which cases the Company has no liability for any resulting loss:

- (a) Power cut of the equipment on the client's side or the provider or communication operator (including voice communication) that serves the Client.
- (b) Physical damage (or destruction) of the communication channels used to link the Client and provider (communication operator), and the trading or information server of the Client.
- (c) Outage (unacceptably low quality) of communication via the channels used by the Client, the media used by the provider, or the communication operator (including voice communication) that the Client uses.
- (d) Wrong or inconsistent with requirements settings of the Client Terminal.
- (e) Untimely update of the Client Terminal.
- (f) When carrying out transactions via telephone (land or cell phone lines) voice communication, the Client runs the risk of problematic dialing when trying to reach

an employee of the broker service department of the Company due to communication quality issues and communication channel loads.

- (g) The use of communication channels, hardware and software generates the risk of non-reception of a message (including text messages) by the Client from the Company.
- (h) Trading over the phone might be impeded by an overload of connection.
- (i) Malfunctions or non-operability of the trading system (platform) including the Client Terminal.
- (j) Outage (unacceptably low quality) of communication via the channels used by the Company, particularly physical damage (destruction) of the communication channels by third parties.

7 Risks Particularly Associated with Transactions in Financial Instruments

- 7.1 Investing in some Financial Instruments entails using “gearing” or “leverage”. In considering whether to engage in this form of investment, the Client should know that the high degree of “gearing” or “leverage” is a particular feature of Derivative Financial Instruments. This stems from the margining system applicable to such trades, which generally involves a comparatively modest deposit or margin in terms of the overall contract value so that a relatively small movement in the underlying market can have a disproportionately dramatic effect on the Client’s trade. If the underlying market movement is in the Client’s favor, the Client may achieve a good profit, but an equally small adverse market movement can not only quickly result in the loss of the Client’s entire deposit but may also expose the Client to a significant additional loss. In regard to transactions in derivative Financial Instruments, a derivative Financial Instrument is a non-deliverable spot transaction giving an opportunity to make a profit or loss on changes in currency rates, commodities, stock market indices, or share prices called the underlying instrument. The Client must not purchase a derivative Financial Instrument unless he is willing to undertake the risks of losing all the money he has invested and any additional commissions and other expenses incurred.
- 7.2 Transactions may not be undertaken on a recognized or designated investment exchange, and accordingly, they may expose the Client to greater risks than exchange transactions. The terms and conditions and trading rules may be established solely by the Company. The Client may only be able to close an open position of any given contract during the opening hours of the Company. The Client may also have to close any position with the same counterparty it was originally entered into. In regard to transactions in Financial Instruments with the Company, the Company is using a Trading Platform for transactions

in Financial Instruments which does not fall into the definition of a recognized exchange or a Multilateral Trading Facility.

- 7.3 This notice cannot disclose or explain all the risks and other significant aspects involved in dealing with all Financial Instruments and investment services. This notice was designed to explain the nature of the risks involved when dealing with Financial Instruments on a fair and non-misleading basis.
- 7.4 Please refer to the Risk Disclosure for Financial Instruments available at the Company's website if you are considering trading with the Company in derivative Financial Instruments.

Important Not

- All Bonus and Incentive Schemes are at the Management's Discretion.
- The company can offer this bonus only deposit to some of its customers.
- This contract is general, and other terms of this reward will be announced at the presentation time.
- If the company suspects the customer (for any reason), it will be able to suspend the customer's account or accounts for some time at the company's discretion, and the company will not be responsible for the possible losses of the customer, and the customer will not have the right to object to suspending his/her account.
-This agreement can be changed/terminated by the company for any reason the company considers at any time; the customer will not have the right to object.

***The Company has the right to change these conditions at its own discretion without prior notice to the client. The client has no right to object to the changes made by the company.**
