- 5.2 Since the Company does not control signal power, its reception or routing via the Internet or any other means of electronic communication, the configuration of Client's equipment or the reliability of its connection, the Company shall not be liable for any claims, losses, damages, costs or expenses, including attorneys' fees, caused directly or indirectly, by any breakdown or failure of any transmission or communication system or computer facility belonging to the Company.
- 5.3 third parties cannot obtain access to the trading facilities. The Client would be held responsible for transactions executed by means of the Client's password even if the Client did not execute such transactions.
- 5.4 Unless otherwise indicated or agreed, any prices shown on the Company's Trading Platform are indicative at the time displayed based on data subject to constant change. The execution price is that which is confirmed to the Client on the Trade Confirmation issued (whether on screen or otherwise) after the Client's order is executed, although this price may, in certain cases, differ from the price appearing on the screen at the time the order was placed. If an erroneous price is used as the basis of any transaction, the Company reserves the right to amend or revoke the details of the transaction(s) in question.
- 5.5 The limit order functionality of the Trading Platform will be subject to the Internet service remaining available over the period in which the limit order is outstanding and will be subject to size limits input by the Company remaining in excess of the Client's order size and such dealer's position limits and/or any other limits determined by the Company to apply to the Client (whether or not disclosed to the Client) still being able to facilitate the order at the time the limit price is reached.
- 5.6 The identification or use of any third-party products, services or websites is not an endorsement by the Company of such services, products, or websites. The Company accepts no responsibility or liability in respect of any materials on any website that is not under the Company's direct control.

6 Market Making

- 6.1 The Client is specifically made aware that in certain markets, including the foreign exchange markets, OTC foreign exchange options and CFD Contracts, the Execution Venue may act as a Market Maker.
- 6.2 The Company will enter transactions with the Client as a Principal (counterparty) and not as an agent. The Company will be the contractual counterparty to the Client and the execution venue of all clients' orders.

- 6.3 Upon the Client's written request, the Company will generally disclose to the Client whether the Company may act as a Market Maker in certain CFD Contracts.
- 6.4 When acting as a Market Maker, the Company will, under normal market circumstances, quote the Client's bid and ask prices.
- 6.5 For the Company to quote prices with the swiftness usually associated with speculative trading, the Company may have to rely on available prices or available information that may later prove to be faulty due to specific market circumstances, for instance, but not limited to, lack of liquidity in or suspension of an asset or errors in feeds from information providers or quotes from Counterparties. If so, and if the Company has acted in good faith when providing the price to the Client, the Company may cancel the trade with the Client but shall do so within a reasonable time and shall provide the Client with a full explanation for the reason for such cancellation.
- 6.6 Following the execution of any position with a Client, the Company may, at its reasonable discretion, subsequently offset each such client position with another Client position or a position with one of the Counterparties or retain a proprietary position in the market to obtain trading profits from such positions. Such decisions and actions may therefore result in the Company offsetting client positions at prices different – sometimes significantly different – from prices quoted to Clients, resulting in trading profits or losses for the Company. This, in turn, can raise the possibility of the Client incurring what may be seen as an implied cost (i.e., the difference between the price at which the Client traded with the Company and the price at which the Company subsequently sold with Counterparties and/or other Clients) due to any profits realized by the Company as a result of the Market-Making function. However, the Market-Making function may involve significant costs for the Company if the market moves against it compared to the price at which it traded with the Client.
- 6.7 The Client accepts that the execution venue in CFD contracts, where it acts as Market Maker, may hold positions that are contrary to the positions of the Client, resulting in potential conflicts of interest between the execution venue and the Client.
- 6.8 In markets where the Execution Venue acts as a Market Maker, the Client accepts that the Company has no obligation to quote prices to clients at all times in any given market nor to quote such prices to clients with a specific maximum spread.
- 6.9 The Client acknowledges, recognizes and accepts that the price quoted to the Client includes a spread when compared with the price to which the Company may have covered or expected to be able to cover the Contract in a trade with another client or a Counterparty. Furthermore, the Client acknowledges, recognizes and accepts that said spread constitutes remuneration to the Company and that such spread cannot necessarily be calculated for all Contracts and that such spread will not be specified at the Trade Confirmation or otherwise revealed to the Client.

- 6.10 The Company reserves the right to adjust the leverage of any trading account at any time or for any reason, such as news, changing trading conditions by Liquidity Providers or any other valid reason. If this is the case, the Company does not consider itself obliged to announce it to the customer.
- 6.11 If the Client is an active trader undertaking numerous transactions, the total impact of visible and not visible costs may be significant. Consequently, the Client may have to obtain substantial profits in the markets to cover the costs associated with trading activities with the Company. For very active clients, such costs may, over time, exceed the value of the margin deposited. Usually, when trading margined derivatives, the lower the percentage of the applicable margin rate, the higher the proportion of the costs associated with executing a transaction. Margined derivatives are CFDs traded with leverage higher than 1:1.
- 6.12 The Client is specifically made aware that in the area of market making in foreign exchange, OTC foreign exchange options, CFD Contracts and other OTC products, significant implied costs can arise as a consequence of the profits made by the Company performing in its capacity as a Market Maker.
- 6.13 The Company's performance as a Market Maker may negatively affect the Client's Account with the Company and the said implied costs are neither directly visible nor directly quantifiable for the Client at any time.
- 6.14 The Client is specifically made aware that CFD Contracts may be OTC products quoted by the Company whilst operating as a Market Maker and not traded on a recognized stock exchange. As a result, the description above of the implied, not visible costs related to the Company's performance as a Market Maker may also apply to any CFD Contract.
- 6.15 Due to low liquidity and/or high volatility and widened spreads, placing pending orders around some economic announcements may be restricted.
- 6.16 The Company reserves the right, at its sole discretion, to delete any Pending Orders older than three (3) months from the Clients' trading account(s). Pending Order is a "Buy Limit", "Buy Stop", "Sell Limit", or "Sell Stop" order, as per the Company's Order Execution Policy. Note: All Pending Orders on Shares CFDs and Commodities CFDs will be automatically closed during market breaks. If any orders on the aforementioned assets are left pending, they will be automatically deleted after daily market closure time.
- 6.17 At the time of starting the market after official holidays, due to market fluctuations, the market may be accompanied by a gap and trades such as Pending Orders, Take Profit and Stop loss are made at a higher or lower price which is entirely normal. The customer must bear responsibility for the resulting loss, and the company has the right to remove orders

without notifying the customer to avoid possible losses. This part of the Agreement is also mentioned to the customer in the "General Risk Disclosure" Agreement.

7 Arbitrage

- 7.1 Internet, connectivity delays, and price feed errors sometimes create a situation where the price displayed on the Trading Platform must accurately reflect the market rates. The concept of arbitrage and or taking advantage of these internet delays cannot exist in an OTC market where the Client buys or sells directly from the principal. The Company does not permit the practice of arbitrage on the Trading Platform. Transactions that rely on price latency arbitrage opportunities may be revoked without prior notice. The Company reserves the right to make the necessary corrections or adjustments to the Account without prior notice. Accounts that rely on arbitrage strategies may, at the Company's sole discretion, be subject to the Company's intervention and the Company's approval of any Orders. The Company will resolve any dispute arising from such quoting or execution errors in their sole and absolute discretion.
- 7.2 The Company shall have no obligation to contact the Client to advise on appropriate action in light of changes in market conditions.
- 7.3 The Client agrees to indemnify and hold the Company, its affiliates and any of their directors, officers, employees and agents harmless from and against any liabilities, losses, damages, costs and expenses, including legal fees incurred in connection with the provision of the services under these Terms provided that any such liabilities, losses, damages, costs and expenses have not arisen from the Company's gross negligence, fraud or willful default.

8 Prohibited Trading

- 8.1 The Client agrees and acknowledges that the service provided by the Company to the Client hereunder is not adapted to certain trading techniques commonly known as "arbitrage trading" or "picking/sniping". the situation where the Client is prematurely buying or selling near preset prices. In the event of the Client employing such techniques, the Client agrees and acknowledges that the Company may, at the Company's sole discretion, take one or more, or any portion of, the following actions:
